HIRING THE BEST CANDIDATES USING AI-ENABLED ATS

The war for talent is real. Onboarding and retaining top talent are becoming an ongoing challenge for organizations. It means that HR and business leaders need to turn to smarter, more accurate and faster means of identifying, selecting and onboarding the right talent.

HERE IS HOW AN INTELLIGENT HIRING ASSISTANT CAN HELP

There is a pressing need for TA teams to optimize the hiring process. Here is how an intelligent hiring assistant can help:

- Communicate with candidates
- Automate the selection process workflows
- Get accurate candidate information
- Make selection recommendations
- Improve productivity

THE BIZMERLINHR APPROACH TO INTELLIGENT RECRUITING

We at BizMerlinHR have leveraged the best of technologies to help companies realize their talent acquisition goals, whether it is about internal hiring or external hiring. Some of the objectives of the intelligent BizMerlinHR applicant tracking system are:

- To hire internally based on the best match of skill set, availability and project needs.

- To streamline external hiring by publishing positions externally on the website and social media and integrate with other job boards.

- To customize the hiring process flows and assessment templates to review and approve candidates.

- To build a long-term talent perspective by nurturing candidates that are not ready to join yet.
